About Us

CELECTRIC MOBILITY is one of the fastest growing EV charging station infrastructure Development Company in Central India. Our EV charging stations meets the necessary safety and reliability requirements and is supported by the industry's most trusted technical and organizational specialists.

We work on a hosting-partner model, where we partner with property owner like hotels, petrol-pumps, midways, shops, restaurants etc. and install, operate & maintain charging station on the property. We provide variety of charging stations ranging from 7KW to DC fast 60 KW. Our charging stations are capable of charging two-wheelers, three wheelers & cars.

Our sole objective is to promote e-mobility across the nation by offering an ultrafast and convenient charging network backed by superior customer service. Our long-term strategy will play a key role in contributing to India's Green deal and economic recovery plan. We are committed to putting India's mobility sector firmly on the path of climate neutrality and economic growth.

Road transportation is the main cause of CO₂ emission in India that summing up to 90% of the total emission. Thus, by offering the range of EVSE, we vision ourselves to be one of the leading names in checking the CO₂ emission due to vehicles and to support the e-mobility in India.

We are on the mission to create an ecosystem for green energy by delivering durable, smart, user-friendly, and safe EV charging station solutions.

We Are Offering ...

Appointment of Charge Point Operators (CPO)

Celectric Mobility offers a partnership model where we provide the charging station at the property, access to our charger management software (CMS), ongoing support, maintenance, promotions & updates and the partner needs to invest in the cost of installation and setup.

Celectric Mobility work with the partner to identify the best technology suited for their needs, including fast charging and moderate speed charging options. We provides marketing and promotional support to help partner to acquire business, including advertising, public relations, and lead generation. Partner receive ongoing support and maintenance, as well as access to Celectric's expertise and resources, such as training and technical assistance.

The revenue is generated through usage fees charged to EV customer using the charging station. The revenue will be shared with the partner as per the agreement. EV customer can access and pay for charging through the Celectric mobile app. available in Apple Play Store and Google Play Store.

Exclusive territories may be available for partners, depending on the location and demand for charging station.

All the designs of charging stations will be provided by us.

How this can be a business opportunity...

Generate revenue through selling electricity

By installing an EV charging point in your business premises, you could generate additional revenue by selling the electricity to the EV customer. Businesses can retain a profit on the price the customer pays to charge their vehicle, so the more EV charging points you have the more revenue you could generate.

Who can benefit

- Corporate Parks
- Builders & Developers
- Hotels
- Restaurants / Highway Dhaba
- Shopping Malls Multiplex
- Educational Institutions
- Hospitals
